

Information from MPI regarding Driver Education

To better support students and host schools, please find registration information for the upcoming Driver Education term included below. We are hoping this will provide answers for some of the registration questions your school may encounter and help keep you informed. Please circulate this information to school staff as required.

Where can students go for registration information?

Once Driver Education courses are finalized, they are published on the Driver Education Course Finder on the Manitoba Public Insurance website (<http://apps.mpi.mb.ca/DL/CourseFinder.aspx>)

When does registration for the upcoming term begin?

Registration for the summer/fall 2017 term (includes courses with a start date between July 1 and December 31) will be available at the start of business on **May 15, 2017**. Courses will be available on Course Finder for students and parents to view only on **May 11, 2017**.

How does reciprocity and the Student Admittance form work?

Students are grouped in one of two registration phases based on their reciprocity (determined by which students a host school allows into their courses):

- **Primary** (usually reserved for students attending the host school) - Students in this group may register for courses as soon as registration is available. For the upcoming term, primary registration runs from **May 15, 2017** to **June 4, 2017**.
- **Secondary** (open to students from other schools or divisions as determined by the host school) - Students in this group may register for courses three weeks after the course has been available to the primary group. For the upcoming term, secondary registration runs from **June 5, 2017** to the course start date.

The **Student Admittance Form** is only given out by a host school to a student who is not included in the school's reciprocity (meaning the student is not included in their primary or secondary registration phase). Student Admittance forms cannot be used to bypass primary registration phase. Please do not issue a form before secondary registration opens as this may cause confusion. The student must wait until the secondary registration phase begins to register.
